

# Finding Grenfell

Trace the  
Grenfell Mission in  
Southern Labrador

Wilfred Grenfell

## Finding Grenfell

Finding Grenfell interpretive panels are located in nine communities in southern Labrador shown on the map on the reverse of this card. Other places on the map — some of them summer fishing stations — figured in Grenfell Mission activities. Additional information and resources can be found on our website, [FindingGrenfell.ca](http://FindingGrenfell.ca).

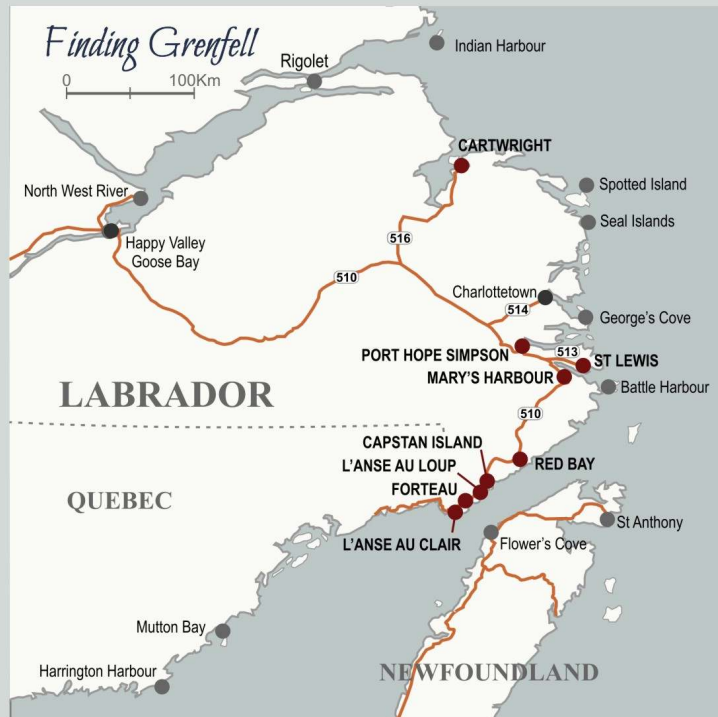

## The Grenfell Mission

Dr Wilfred T. Grenfell came to the coast of Labrador in 1892 on behalf of the Royal National Mission to Deep Sea Fishermen. His job was to assess the living conditions and needs of remote fishing communities in Labrador and northern Newfoundland. His findings changed his life, and the lives of the people he served. Finding Grenfell tells the story of the many nurses, workers and volunteers who contributed to the success of the mission and its legacy.
